## CALCIUM FORMATE

CHEMICAL NAME:CALCIUM FORMATE

Molecular formula: Ca(HCOO)<sub>2</sub>

CAS NO.:544-17-2

SPECIFICATION ( Q/ZRB001-2009)

Index item	Quality standard
Appearance	White crystalline powder
Calcium formate,%≥	98
Ca Content(%) ≥	30.1
Dry-loss(%) ≤	0.4
PH of 10% solution	7.0-7.5
Non-solubles(%) ≤	0.3
Heavy Metal(Pb) % ≤	0.002
As(%) ≤	0.002

### PROPERTIES:

White or beige crystal or powder, neutrality, and has no poison. Not dissolve the water and taste bitter.

### APPLICATION:

Calcium Formate is an organic acid salt for use in pig and poultry diets. It is also another type of nonchloride accelerator used to accelerate the setting time of cement, and it widely use in making better leather and some chemical product.

### STORAGE:

To store in a cool, dry place in a tightly closed container.

### PACKING:

N.T. 25kg or big-bag inner lining
